Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is combination of the specific gases and the specific film forming or organic polymer envelop materials, as claimed, which are used in the methods of making the contrast agents. The showing of unexpected results presented (data) for the claimed microbubbles has obviated rejections based on obviousness. This data shows an unexpected improvement in microbubbles comprising the claimed fluorinated gases with the claimed film forming materials, as compared to the non-fluorinated gases in the cited primary references with the same film forming materials. Further, the prior art fails to provide the requisite motivation to pick the specific gases as claimed with the specific polymer envelop materials that bound the gas as the gas/liquid interface to form the claimed microballoons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
